Pornhub verifies child sex trafficker and monetizes the sale of a minor

Press Release Fri, 18 Sep 2020

I wanted to bring this breaking story about Pornhub's complicity in child sexual abuse and trafficking to your attention.

A 16 yr old was sexually abused by an Alabama man that Pornhub had verified into their monetized ModelHub program through which Pornhub earns 35% of the sale of content.

Any commercial sex act involving a minor is by definition sex trafficking according to the federal Trafficking Victims Protection Act. The monetized child pornography (CSAM) video was up for two years with over two thousand views.

This story has national and international implications, and comes on the heels of the rise of the #Traffickinghub campaign to shut down Pornhub for aiding sex trafficking that was initiated in February 2020. The Traffickinghub petition based on multiple cases of women and children being raped and trafficked for profit on Pornhub currently has over 2 million signatures from 192 countries and can be found at Traffickinghub.com The campaign video gained over 30 million views upon release.

The Traffickinghub movement founder, anti-trafficking expert Laila Mickelwait, commented on the breaking story.
